## Motorized Travel Guide for Clearwater National Forest

### 2014

*Nez Perce-Clearwater*

*National Forests*

# WELCOME TO THE NEZ PERCE-CLEARWATER NATIONAL FORESTS

Let us help you plan your trip to the Nez Perce-Clearwater National Forests. This guide covers the Clearwater portion of the forests; the Clearwater covers 1.8 million acres of Idaho's forests stretching from the jagged peaks of the Bitterroot Mountains on the Montana border, west to the rolling hills of the Palouse Prairie.

Elevations here range from 1600 to almost 9000 feet. Much of the landscape is deep-forested canyons interspersed with high, rugged ridges.

Distinct seasons come and go, and much of the Forest is snowbound December through May. A pleasant summer season extends from June through September although higher elevations generally remain inaccessible until July.

Summer temperatures may reach the 90s, but nights are cool. Lightning storms often strike in July and August, and snow can begin falling in late summer or early autumn. Before you leave to sample the many recreational opportunities in store for you, take a moment to look over the Forest Visitor Map and this Travel Guide.

We've put the Motorized Travel Guide together to display the **motorized travel routes** on the forest and to provide an overview of the travel information we have available and some ideas on how to use the various

maps and guides to help you plan your trip. We've also included some general visitor information and a few ideas on places to go or stay while you're here.

The Motorized Travel Guide includes information on motorized access that applies to travel on selected roads, trails, and areas of the Forest.

**This guide relates directly to the data presented on the Clearwater National Forest's Motor Vehicle Use Map (MVUM).**

We appreciate your help in protecting the Forest's wildlife, streams, timber and other resources. Please contact any one of our offices if you'd like to discuss travel restrictions or any other aspect of national forest management. Your comments on this year's edition of the Motorized Travel Guide will be used to help us prepare our next revision. Watch for hazards, and drive safely. Most of all, enjoy your visit!

Rick Brazell  
Forest Supervisor

## TRAVEL ON THE CLEARWATER NATIONAL FOREST

### ROAD SYSTEM

The road system on the Clearwater National Forest was constructed over many decades. Initially, roads were constructed for fire control. These roads provided access for fire lookouts and for fire fighters to locate and put out forest fires. After World War II, the national demand for wood products drove the development of new roads on the National Forest. These roads were developed to provide access for timber harvest and to transport logs back to area mills. In more recent times, these roads have evolved into recreational routes, providing access for activities like hunting, berry picking, hiking, sightseeing, and Off-Highway Vehicle travel.

**There are approximately 2,961 miles of motorized roads, open yearlong or seasonally on the Clearwater National Forest. These roads range in standard from narrow single-lane native surface (dirt) to double-lane paved roads, with the majority being native surface.**

### ROAD DECOMMISSIONING

Modern logging systems require far fewer roads than the logging methods that were in use when the road system on the Nez Perce-Clearwater NFs was developed. Today, the Forest is in the process of completing an inventory of all roads, and is actively decommissioning roads that will not be needed in the future. This helps to stretch scarce road maintenance funds and also helps to protect water quality and reduce disturbance to wildlife in the long run.

### TRAIL SYSTEM

An extensive summer trail system crisscrosses the Clearwater NF. There are approximately 1,960 miles of trails in the Clearwater NF system and about 1,400 are maintained with the funds available in recent years. All of the trails are open to hikers and most are open to stock. Many are available for mountain bikes. These non-motorized trails are not shown on the MVUM. Some trails are available for motorcycles and small vehicles 50 inches or less. These trails are shown on the MVUM.

### NATIONAL TRAILS

The Clearwater National Forest also has several trails that have been designated as National Recreation Trails. These trails provide access to popular attractions, like Elk Creek Falls. There are also two National Historic Trails on the Forest: The Lewis and Clark National Historic Trail and the Nee Me Poo (Nez Perce) National Historic Trail. These trails are non-motorized.

### REASONS FOR ROUTE RESTRICTIONS

Many people ask, "Why does the Forest Service close roads or trails?" Road and trail use restrictions generally come about during an environmental analysis review of an area. During this review, the Forest Service looks at all the resources in the area, such as wildlife and vegetation, to see if resource goals are being met.

Our goal is to balance the impacts for all resources. For example, a timber sale may create forage for elk and improve forest health, but make elk more vulnerable to disturbance by people traveling the roads needed to harvest the timber. A way to reduce the disturbance to elk, while

allowing needed timber management, is to restrict motorized access. The decision to restrict access seasonally or yearlong is part of this balancing of effects for all resources and users in an area.

There are a number of reasons for managing access to Clearwater National Forest roads or trails. The most common ones are:

**Wildlife** - Timber harvest and road construction in some cases have made wildlife more vulnerable to disturbance by humans. For example, when hiding cover has been reduced, restricting road use compensates by reducing human disturbance in key elk summer range, winter range, and elk calving areas. This provides the elk with needed security and reduces stress on the animals.

**Soil/Water** - Some of the roads on the Clearwater National Forest are not graveled or paved. These dirt roads rut easily from vehicle traffic during wet weather, common in the spring and fall of the year. Even one vehicle during wet conditions can rut a road. Once rutted, water can easily flow down the ruts eroding away and damaging the road. This can also occur on trails. Sediment from the eroding roads or trails can reach the streams causing negative effects to fish. Soil and water based restrictions help to reduce erosion and sedimentation, resulting in better stream conditions. They also help to stretch the available road and trail maintenance funds resulting in better maintenance and a smoother, more enjoyable trip on roads and trails that are open for traffic.

**Facilities** - Some roads lead to facilities such as radio equipment and lookouts. Vandalism in the past has forced the Forest Service to restrict access on some of these roads to protect these facilities. These restrictions help to preserve vital

communication links and save limited maintenance funds.

**Conflict** - On some roads or trails, use by recreational vehicles of different types, sizes, and speeds could lead to dangerous situations. Certain trails are closed by law to motorized and mechanized vehicles. These include trails in designated Wilderness areas and certain National Recreation and National Historic Trails. Other trails are known to be too narrow to accommodate OHV traffic and in some locations motorized use conflicts with overall management objectives for the area. Restrictions in this conflict category help to provide visitors with a more enjoyable and safer trip on the Clearwater National Forest.

## **OBSTACLES TO TRAVEL**

It's important to note that you may not be able to travel a road or trail with all vehicles or in all weather conditions even though the road or trail has no travel restrictions in effect. For example, some roads will require a high clearance vehicle, and some trails may not be suited for travel by motorcycles. Roads that have not been used in a long time may be completely grown in and impassable to all but foot travel. Nearly all roads become snow covered and impassable to wheeled vehicles in winter.

Do not travel beyond rocks, signs or other barriers that have been placed to specially discourage travel.

Contact the appropriate Ranger District or the Forest Supervisor's Office for specific information on a road or trail. A complete list of motorized roads and trails can be found in the back of this Motorized Travel Guide.

## **ACCESS QUESTIONS OR COMMENTS**

The Clearwater NF maintains a mix of motorized and non-motorized opportunities for Forest visitors.

If you have questions or comments concerning specific road or trail travel restrictions, contact the appropriate Ranger District or Forest Supervisor's Office any time during the year. The Motorized Travel Guide is revised in conjunction with Motorized Vehicle Use Map (MVUM) revisions, and we consider all comments during its revision.

If you are interested in providing comments about travel management as part of an individual project or environmental analysis, you can request to be put on a mailing list for proposals that affect access. You will receive a copy of each proposal for a District or the Forest, whichever you choose. Your comments during the environmental review will assist us in making a better decision.

## **PLANNING YOUR TRIP**

Ranger Districts and the Forest Supervisor's Office have reference materials and maps available to help you plan your trip on the Clearwater National Forest.

## **AVAILABLE INFORMATION**

**Clearwater National Forest Visitors Maps** are available in waterproof format for \$10 each at Forest Service offices and some local sporting goods stores. This map is at a scale of 1/2 inch per mile and it shows main roads and trails on the National Forest and nearby. The Visitors Map also shows adjacent private ownership, campgrounds, Ranger Station and work center locations, and other items of interest.

**Clearwater Motorized Vehicle Use Maps (MVUM)** are available in paper format, at no cost at the Supervisors office and ranger district offices, online from the forest website: <http://fs.usda.gov/nezperceclearwater>, or geo-referenced from AVENZA maps. See the forest internet site for more information.

**US Geological Survey Quadrangle Maps** (quad maps) are available for \$8 each at selected offices including: the Supervisor's Office and North Fork Ranger Station; Palouse Ranger Station; and Lochsa/Powell District Office at Kooskia; and Lolo Pass Visitors Center. These maps are at a scale of 2.64 inches per mile, and show roads, trails, topographic contour lines and features, as well as areas of special interest. Quad maps are particularly helpful for persons who want to travel some of the lesser used roads or trails and for cross-country hiking.

**The Clearwater NF Motorized Travel Guide** is available at no charge at Forest Service offices. This guide relates directly to the data presented on the Clearwater National Forest's Motor Vehicle Use Map (MVUM).

The Motorized Travel Guide provides specific information on road and trail opportunities. The Guide is updated as needed to reflect changing conditions, so check to make sure you have the most current edition.

To use the Motorized Travel Guide, first select the road or trail you wish to travel using either the Visitors Map, MVUM or a US Geological Quadrangle map. Then, check the Motorized Travel Guide to see if that road or trail has any restriction to the vehicle you plan to use. If the road you wish to travel is listed in the Motorized Travel Guide, it is open to use by designated

motorized vehicles. If the trail you wish to travel is not listed in the Travel Guide, it is not open to motor vehicles. Keep in mind that motorized roads or trails may not be able to physically accommodate all types of vehicles.

**Brochures** are available describing particular routes.

A map of groomed snowmobile routes produced by the Ridgerunners Snowmobile Club can be obtained for a \$3 donation at local businesses including sporting goods stores.

### **The Clearwater National Forest Over Snow Vehicle Use Map (OSVUM)**

The forest produces an Over Snow Vehicle Use Map (OSVUM), this is a paper map, free to visitors. This map will be revised as needed.

### **HOW TO PLAN YOUR TRIP**

If you intend to travel the main roads on the Clearwater National Forest, you need the Visitors Map and the Motorized Vehicle Use Map. If you want to get away from it all and travel the lesser used roads, the US Geological Survey quad maps will show the road and trail numbers for all the roads in an area. The Motorized Travel Guide shows routes designated for motorized travel and lists motorized use dates for the road and trail routes. Keep in mind that current ground conditions may make your road or trail impassable. A road may be overgrown with vegetation making it impassable to some vehicles. A trail may be too narrow to accommodate an OHV. Trees may have blown across your route of travel making it impassable. The Ranger District or Forest Supervisor's Office can provide current information on the road or trail you wish to travel. If you find a road or trail damaged by weather or blocked by fallen trees or debris, notify the District or Forest Supervisor's Office, and we will schedule it for repair or maintenance.

### **RESTRICTION SIGNS AND GATES**

All restricted roads and trails generally have a sign describing the restriction. Most restricted roads will also have a gate or barrier which is closed during the period of restriction. However, you may find a restricted road or trail without a sign, without a gate or barrier, or with a gate or barrier that has been left open. This is usually caused by vandalism. The designation in the Motorized Travel Guide still applies, even if the sign is missing or the gate or barrier is down or absent. If you find a damaged gate, barrier or sign, contact the District or Forest Supervisor's Office, so that we can make the repairs.

### **DON'T BLOCK THE GATE**

Even though a restriction is in effect, official motor vehicle access may still be needed for fire control, emergencies, and ongoing work by contractors and Forest Service personnel. This access is authorized only through a written permit issued by the District Ranger.

So, don't park your vehicle so that it blocks a gate or barrier (36 CFR 261.10(f)); someone may have a permit and need to get through, or the road may be seasonally open behind the gate to small motor vehicles (motorcycles and/or OHVs). To avoid surprises during the fall hunting seasons, the Forest Service may post a sign on restricted roads to inform people that Forest Service employees or contractors are working behind the gate or barrier or that the road is open for disabled hunters with a permit (see below for disabled hunter information).

## MOTORIZED TRAVEL

### WHAT IS AN OHV?

An off-highway vehicle (OHV) is a motorized vehicle capable of traveling off the "normal" highway system. An OHV is a motorized trail vehicle less than or equal to 50" in width with three or more low pressure tires.

### LICENSING REQUIREMENTS FOR VEHICLES AND OPERATORS

OHVs and motorcycles used on National Forest roads and trails are subject to State of Idaho laws and requirements.

OHV users on national forest lands are expected to comply with all licensing requirements.

The current requirements for riding these vehicles on Forest Service and other public roads are found here:

[http://parksandrecreation.idaho.gov/sites/default/files/uploads/documents/Recreation/OHV%20Website/Keep/OHV\\_Booklet\\_2013\\_small.pdf](http://parksandrecreation.idaho.gov/sites/default/files/uploads/documents/Recreation/OHV%20Website/Keep/OHV_Booklet_2013_small.pdf)

- State law requires an off-road sticker for riding OHVs on all national forest roads and trails.
- State law **requires all riders under 18 years** of age to wear a helmet.
- State law **requires all riders 16 years of age and older** to be licensed.
- State law **requires riders under 16 years of age** to take an approved safety course and to ride with a supervising adult who is on another ATV, UTV, specialty off-highway vehicle or motorbike, or if on the ground,

within three hundred (300) feet of the unlicensed operator, for the purposes of having the supervising adult provide close support, assistance or direction to the unlicensed operator.

### STICKER PROGRAMS WHERE DOES THE MONEY GO?

Aside from the fact that it's a legal requirement in the State of Idaho, there are a number of benefits to purchasing an OHV or snowmobile sticker for your machine. The Idaho Department of Parks and Recreation allocates money from sticker sales to fund things like snowmobile grooming, and motorized trail construction and maintenance. For example, the extensive snowmobile grooming program on the Clearwater NF, Idaho State Lands, and adjacent private lands depends entirely on sticker funds and dedicated volunteers for its accomplishment.

### OHV SAFETY

OHV accidents that result in serious injuries occur every year on the Clearwater National Forest and elsewhere. Many of these can be traced back to untrained riders, or careless riding. You can do several things to help make your trip a safe, enjoyable experience.

- *Get formal training.* Courses in the safe operation of your OHV are available from dealers and through organizations like the ATV Safety Institute.
- *Know your vehicle and skill level.* Trail bikes are permitted on many Forest trails, but the skill level required varies considerably from one trail to another. Most Forest trails are not designed for OHV's. Scout your trail, and

stop before you get in over your head or beyond your vehicle's capability.

- *Follow traffic rules.* Kids under the legal driving age have no concept of the traffic rules that are second nature to adults. They are much more likely to drive on the wrong side of the road, stop in the middle, or to make other maneuvers without looking or signaling. That's one of the reasons why driver's licenses are required to operate OHVs on roads that are open to highway traffic. Unfortunately, adults who know better can also forget the traffic basics while having fun with an OHV. Cutting corners, watching the river instead of where you're going, or too much speed can easily ruin your day.

***Wear protective gear.*** Idaho state law requires riders under 18 to wear a helmet when operating motorcycles on roads open to highway vehicles. Helmets are a good idea for everyone riding OHVs, as heads don't suddenly become more durable after age 18. Other protective gear like goggles, gloves, long pants and boots will help you concentrate on riding and offer some protection in an accident.

## PROTECTING RESOURCES

### OHV USERS

OHVs can provide an enjoyable travel experience but they can also cause substantial damage to the landscape if used inappropriately. Some damage is immediately obvious after a vehicle or a few vehicles pass. Other impacts develop more slowly over time as a result of repeated damage. Many impacts can be reduced or avoided entirely if riders think ahead.

- Use this Travel Guide to know where and

when you can ride your OHV.

- **Ride on designated roads and trails, not cross-country. Cross-country travel is expressly prohibited on the Clearwater National Forest.**
- Avoid all travel in sensitive areas like meadows, bogs, streams, lakeshores, and other wet areas. Scars from churning wheels will last indefinitely.
- Give wildlife plenty of room especially when they are rearing young or stressed by winter conditions. Stress during critical winter periods can use up limited energy reserves and make a life or death difference.
- When you meet approaching traffic on a trail, don't automatically try to pass right where you meet. Think about the effects of this happening repetitively. Will it damage vegetation or widen the trail over time? Maybe there's a better spot if one of you backed up a little.
- When turning around on a trail, look for a solid spot. Also, you'll disturb less country if you use reverse and stay on the trail as much as possible rather than making a wide circle.
- If you see existing damage, don't add to the problem.
- Walk to viewpoints and points of interest along the trail instead of riding that last few feet.
- Don't widen trails so your vehicle can fit or build new trails. Both these activities are prohibited [36CFR 261.13(h), 261.10(a)] and inevitably lead to more restrictions on OHV use.

- Join Tread Lightly. Members of this organization are primarily motorized users dedicated to minimum impact travel. They offer a variety of booklets and educational materials about light on the land travel with all types of vehicles. You can get membership information by calling (800) 966-9900.
- Set a good example. If you see access violations, vandalism, or damage occurring, report it to Forest Service personnel or the nearest Forest Service office. Remember, violators put your recreation opportunities at risk.

### OHV COURTESY

You can make a very positive, or a very negative impression on people you meet along roads or trails while riding your OHV. The people you meet may very well form strong opinions about motorized travel as a result of your encounter with them.

- Keep your speed down. Trails aren't racetracks and other users won't appreciate being surprised, chased off the trail, or buried in mud or dust.
- Take time to visit with people you meet. Turn off the engine, and take off your helmet. Create a positive impression of motorized users.
- When you meet stock such as horses, mules,

llamas, and pack goats, pull off on the downhill side, and shut off your engine. And again, take off the helmet and speak softly so the stock realizes you're a human under all that riding gear.

- No one appreciates a loud machine that can be heard for miles. Make sure your OHV has a muffler and it's in good working order. The Idaho law for OHVs is 96 decibels at a distance of 1/2 meter.
- Recreational riding within developed campgrounds is not permitted. OHVs can be used only to enter and leave the campground, not to circle repetitively.
- Don't drive your ATV or 4x4 on groomed snowmobile routes - it damages the track and creates a hazard for snowmobile riders.

## NON-MOTORIZED TRAVEL

### PROTECTING RESOURCES

Here are a few ideas to make your hiking or pack trips enjoyable, while at the same time helping to protect forest resources.

- Never short cut switchbacks; it leads to erosion.

- Always ride or walk single file on trails.
- Camp away from trails and sites that are already used too much.
- Move off a trail on the downhill side and remain quiet if you are hiking or using a llama or goat for packing and encounter horse and mule users.
- Pack out everything you brought in and maybe a little more.

### STOCK USERS

- Use a highline, hitch rail, or electric fencer to hold stock and set it up well away from water.
- Don't tie stock directly to trees for more than a few minutes to avoid soil compaction and root damage.
- Scatter manure when you leave.

### NOXIOUS WEEDS

Noxious weeds are a growing, spreading problem on the Forest. They displace native vegetation, reduce wildlife habitat and diversity, and increase erosion rates. Noxious weeds are one of the most serious threats to wildlife and ecosystems in the west. Here's what you, as an OHV enthusiast, hiker or stock user can do to help stop the spread of noxious weeds:

- Learn what the major noxious weeds look like. Brochures and posters are available in many county, state and federal offices.
- Report locations of noxious weeds to any Forest Service or county extension office.
- Clean your ATV, motorcycle or bike before coming onto the Forest and especially before traveling into remote areas. The worst weed problems are now along some roadsides and trailheads. They can be transported deep into the backcountry by OHVs.
- Brush manes and tails and clean hooves on livestock before coming on the National Forest or after travel through a weed area.
- Remove noxious weed seed from your gear before entering the National Forest.
- Feed pack animals only certified weed-free feed within 48 hours of entering the Forest. (Check with any Forest office for a list of growers and suppliers of weed-free feed.)
- Pack only certified weed-free forage or feed pellets onto National Forest land.
- If you pull or remove weeds with seed heads, bag, burn, or otherwise dispose of them.
- Avoid travel through noxious weed areas or campsites with weed populations.

## GENERAL VISITOR INFORMATION

### OFFICE LOCATIONS

A list containing the Forest Service office locations, addresses, seasons open, hours, and phone numbers is on the inside back cover of this Travel Guide.

### CAMPING INFORMATION

You can camp in many developed campgrounds across the Clearwater National Forest; or you can "disperse" camp, or choose your own campsite. You'll generally find no amenities such as water and toilets at dispersed campsites.

Developed campsites range from day use areas like beaches or picnic areas, to campgrounds with a range of amenities and variations in fees, generally from \$5 - \$15. Developed campgrounds are generally open Memorial Day through Labor Day. Some stay open 'til the snow flies.

On most of the Clearwater National Forest, camping in any one area is limited to a total of 18 days from May 1<sup>st</sup> to October 5<sup>th</sup>. There is no camping limit during the rest of the year. But, any camp set up or in use during the restricted use period is subject to the 18-day limit.

In the Selway-Bitterroot Wilderness, developed recreation sites, and a few other identified areas, the 14-day limit is in effect yearlong.

Camps must be moved a minimum of five miles from the original site to qualify for a new 14-day period, and cannot be moved back to the original site within 45 days [36 CFR 261.58(a)].

A few rules may be posted in campgrounds or at popular dispersed sites. The rules are meant to protect the site and the environment. They're meant to help you enjoy your camping trip.

Pack out all your garbage and litter when using dispersed sites. Dispose of human waste by burying 6 to 8 inches deep and at least 200 feet from water, trails, beaches, and campsites. Use biodegradable soap for washing dishes and dispose of wastewater at least 200 feet from streams or lakes. Charred wood and ash in the fire ring should be scattered before you leave. Leave the area better than you found it.

A firewood permit is not needed to cut wood for your campfire, but please use dead or down trees for your fuel.

Use existing dispersed campsites. The Clearwater Travel Plan prohibits the creation of new sites or new OHV access routes to existing sites. Protecting the Forest land while accessing and using dispersed sites is described below.

## **ACCESS TO DISPERSED CAMPING**

Dispersed camping (camping on the Forest outside of a developed campground) is very popular across the Forest and there are numerous existing campsites. Many of the potential impacts associated with dispersed camping are related to motor vehicle use. Some of the potential impacts associated with this activity may include driving across streams or down stream banks, developing multiple tracks into or between campsites as a result of repetitive OHV travel, and pioneering new campsites and motorized tracks to them.

In response to public comments, a standard set of conditions has been developed that will apply Forest-wide. The conditions below are designed to meet the intent of the Travel Rule and to minimize the potential adverse effects on Forest resources and users associated with motor vehicle travel to dispersed campsites:

- Motorized travel to dispersed campsites along designated routes is included as designated route travel as long as the conditions for that travel are met. When the conditions below are not met, the motorized travel is illegal.
- To meet the intent of the rule, motorized travel to dispersed campsites along designated routes would be permitted within 300 feet of a designated route during the period when that route is open to motorized traffic. The 300 foot distance is measured perpendicular to the designated route. Campsites, even where they currently exist, that are beyond the 300 foot distance would be off-limits to motor vehicles.
- Since the intent is to minimize damage to Forest resources while providing for camping access, it would not be permissible to roam around with a motor vehicle off the designated route while looking for a campsite. Campers are expected to explore and evaluate campsites by non-motorized means and travel to them with their vehicle using the most clearly defined existing track. Cutting corners on the established track or taking shortcuts back to the main road or trail would not be permitted. Again, since the intent is to provide for camping access, repetitive recreational riding around in the

campsite or along the access route would not be permitted.

- To minimize adverse effects to Forest resources, barriers of logs, rocks, or earth, gates, and/or signs have been or may be placed to restrict vehicles from sensitive or damaged areas such as wet areas, streamside zones, redundant tracks, or for other resource protection purposes. Moving, going over, going around, or in any way circumventing these restriction devices would not be permitted.
- Any motorized travel that causes resource damage is prohibited (36CFR261). Examples of resource damage associated with motorized travel to dispersed campsites include but are not limited to:
  - Cutting, harming or unreasonably disturbing vegetation Clearwater National Forest Travel Planning Record of Decision ROD – p. 21
  - Using more than one track to access the campsite
  - Crossing streams, driving on stream banks, or riding in any wet area off the established track where rutting occurs.

## LOOKOUT AND CABIN RENTALS

The Clearwater National Forest has several rustic cabins and fire lookouts which are available for rental.

Lookouts are located at Castle Butte, Weitas Butte, Bald Mountain, and Wallow Mountain. These facilities range in price from \$25-\$65 per night and can hold up to 4 people. They provide spectacular scenery from rustic buildings in primitive settings. For more information, contact any Ranger District office or the Forest Supervisor's office. Reservations can be made at [www. Recreation.gov](http://www.Recreation.gov) or call (877) 444-6777.

## FIREWOOD CUTTING

If you want to cut firewood for your personal use at home, stop by any Forest Service office to buy a permit. The minimum permit costs \$20 and allows you to cut four cords. Each additional cord is \$5. You can buy a permit for up to 12 cords. Cut only dead trees under this permit. Live, green trees cannot be cut for firewood, nor can live or dead western redcedar.

Read your permit and follow the requirements, which include fire safety considerations like having a working spark arrestor and fire extinguisher, and some other requirements on where not to cut and which tree species are available. Remember that only dead trees can be cut under this permit. Also, the permit is only valid on National Forest land. The Clearwater National Forest Visitors Map displays land ownership and boundaries.

Caution should be exercised when cutting firewood. If you are cutting dead trees that are still standing, size up the tree carefully, so you get it to fall where you want. If the tree will land in the road, have someone available to stop traffic well outside the danger area. As a favor to others, please don't fell trees onto paved roads or other roads that get a lot of traffic. Also, don't walk away from trees that are partially cut, as they are a hazard to others. When you are done cutting and loading, take a few minutes to clear limbs, bark, and other debris off of roads, ditches and cut slopes and scatter it over the bank.

You are not allowed to drive motor vehicles off roadways to gather or skid firewood. This includes ATV's and motorcycles.

## Lolo Trail Corridor Firewood Restrictions

A special firewood policy is in effect to help preserve the historic character of the National Historic Landmark. In brief, the policy is:

1. All personal use firewood gathering (wood for home use collected under a firewood permit) is prohibited within ¼ mile either side of the historic trails (Lewis & Clark, Bird Truax, and Northern Nez Perce) and the Lolo Motorway.
2. Camp-wood gathering is prohibited in a few selected areas indicated by signs.

Complete information is available at all Clearwater National Forest offices and will accompany all wood permits.

## PICKING AND GATHERING

Many people like to pick huckleberries and gather mushrooms from the National Forest. You're welcome to harvest these delicacies for your personal use and enjoyment without needing a special permit. Note that personal use mushrooms do require a free permit.

**However, if you plan to sell what you pick, you do need a special permit. Contact any Forest office for details.**

## **FIRE SEASON**

In Idaho, fire season begins May 10 and ends October 20. State law requires Forest visitors to have a shovel and bucket in their vehicle. This applies to ATV's, motorcycles, and other OHVs as well as larger, highway vehicles. Your safety helmet qualifies as a bucket under the law. Your OHV must have an approved spark arrestor/muffler.

Please keep your shovel and bucket handy, and use them to make sure your campfire is out. Use fire rings and grates at campgrounds and dispersed sites. When camping where no fire ring or grate is located, consider using a portable fire pan nested in the earth instead of gathering rocks to create a new fire pit.

## **BEING PREPARED**

Much of the Forest is remote, with no towns nearby and no services. You should come prepared for unexpected situations by having extra gas, food, clothing and water. Your vehicle needs to be in good working order, with good tires. Ranger District offices and work centers do not sell gas or have personnel to repair private vehicles.

## **EMERGENCIES**

The Forest Service is not staffed or equipped to respond to emergencies other than wildland fires.

The County Sheriff's Department has the primary responsibility for performing search and rescue operations and coordinating other emergency services.

You can report fires, vehicle accidents, injuries, or lost persons at the nearest Ranger District office, work center, or to any Forest Service employee. Be aware that cellular phone communication is not possible from many areas of the Forest. However, most Forest Service employees have two-way radios and can help you report an emergency.

Emergency call boxes are located on US Highway 12 along the Lochsa River. These call boxes connect the caller directly with Idaho State Police.

Any costs associated with an emergency, for example, ambulance service, is the responsibility of the person requesting the service.

You can find County Sheriff's Department telephone numbers on the back of this Travel Guide.

## **DRIVING BACK COUNTRY ROADS**

Most Forest roads are gravel or unsurfaced and are probably narrower and steeper than the roads you ordinarily drive. Considerably slower speeds and greater attention are needed to drive them safely. Here are a few driving tips:

- Look out for yourself and others while driving. Remember, if you have an accident,

emergency help is a long, long, way away.

- Drive at a speed where you feel you have control of your vehicle. Keep in mind the road, weather, and traffic conditions.
- Be alert and concentrate on driving; not checking out the river for a fishing spot or looking at the scenery.
- Keep an eye out for turnouts and be willing to back up if the closest spot to pass happens to be behind you. Watch out for small OHVs. They share the road with you.
- On curves, be able to stop your vehicle in less than half the distance you can see ahead.
- Drive like there is an oncoming vehicle around every corner, because sooner or later there will be. Stay to the right side of the road and don't cut corners.
- Stay away from roadway edges to prevent going over the roadway embankments. The shoulders of many Forest roads become soft after a soaking rainstorm and can pull your vehicle off the road.
- When turning around on narrow or mountain roads, have someone "spot" for you if you can, or walk around your vehicle to size up your situation before backing. Always back uphill or toward the bank. In other words, face danger. Turn around before conditions are hazardous and it's too late!

## **DISABLED HUNTER ACCESS PROGRAM**

The Clearwater National Forest has set aside a number of roads and trails, which are otherwise restricted for use by the public, for hunter access by persons with disabilities. These roads and trails are available for use by disabled hunters on a first come first serve basis and require a permit, which can be obtained at the Forest Supervisor's Office or from the Ranger District where the road is located. Contact the local Ranger District Office for a current list of roads.

## MOTOR VEHICLE USE MAP (MVUM) LEGEND FOR ROAD AND TRAIL ALLOWED USES

DESIGNATED ROADS		D I S T R I C T	36 CFR 212.51 ALLOWED MOTORIZED VEHICLES AND USE PERIOD Blank " " Indicates No Motorized Use			ACCESS MILEPOSTS		ROAD LOCATION	
			ALL VEHICLES 	OHV < 50" 	MOTORCYCLES 	BMP	EMP	From	To
ROAD Number	ROAD NAME								
4699	SHAWNEE	5		06/01-09/30	06/01-09/30	0.00	1.00	Road 4719	SE SEC 26

See Motor Vehicle Use Map (MVUM) for Road and

Official Road or Trail name

Code for the Ranger District where the road or trail is located.  
 2 - Palouse RD  
 3 - North Fork RD  
 5 - Lochsa RD  
 6 - Powell RD

The period of allowed motorized use is shown for each vehicle type.  
  
 In this example, Highway vehicles are not allowed on the trail at anytime, OHV's less than 50" are allowed 6/1 to 10/1 and Motorcycles are allowed 6/1 - 10/1).

Mileposts where Allowed Motorized Use begins and ends. A road or trail may have multiple access changes along the route. Note dates and vehicle types allowed in the three columns to the left of BMP.

Location information where road or trail begin and end are described by local features such as road junctions, road mileposts, or road ends. A legal description by township, range and section may also be shown.

All Vehicles over 50 inches in total width measured at their widest point.

OHV - Motorized trail vehicles less than or equal to 50" in width with three or more low pressure tires.

Motorcycle - Motorized trail vehicle with two wheels (one behind the other) with a seat designed to be straddled by the operator, 40-inches or less in width, capable of being operated on a single-track trail with a maximum tread width of 18-inches.

Idaho County Sheriff

(208) 983-1100

Idaho Department of Fish and Game

(208) 799-5010

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD).

To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.
